DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 24 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 24 is rejected based on lack of positive antecedent basis of "the bus connector" on line 1.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 15, 19, and 26 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 2 and 3 of U.S. Patent No. 6,665,763 B1. Although the conflicting claims are not identical, they are not patentably distinct from each other because the only real difference is that the patent claims recite a storage array and then goes on to claim what each storage device in the array comprises, while the application claims are only directed to a single drive and what it comprises. The single drive of the application

Art Unit: 2111

claims is made up of the same elements as the "each storage device" of the patent claims.

Official Notice is taken that it would have been obvious to one of ordinary skill in the art at the time of the invention to use a single one of the storage devices recited in the patent claims if an array of disks were not needed.

The claims correspond to each other as follows:

Applic. Claim	Patent Claim
15	2
19	3
26	2

Allowable Subject Matter

5. Claims 16-18 and 20-25 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. The following is a statement of reasons for the indication of allowable subject matter: As noted by applicant in the remarks filed with the preliminary amendment, claim 15 includes the limitations of the bus having a variable stub length and the expander controlling the stub length of the bus. These limitations were the indicated reason for allowance of the claims in the parent, and the prior art still does not show these limitations.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The newly cited references discuss SCSI and stub length (Paul and Caldwell) but do

Art Unit: 2111

not show an expander controlling stub length of a variable stub length bus. The reference to Bertin et al. discusses variable stub lengths, but not in a drive system as claimed.
